## Linux History: A Reminder!

I've nearly finished Wiley's 10th Edition of the Linux Bible and it's a wonderful book. In it, way back near the start, there's this gem — and it really tells us how far Linux has come.

Some histories of Linux begin with the following message entitled "What would you like to

see most in minix?" posted by Linus Torvalds to the comp.os.minix newsgroup on August 25, 1991, at

https://groups.google.com/forum/#!msg/comp.os.minix/dlNtH7RRr
GA/SwRavCzVE7qJ

Linus Benedict Torvalds

Hello everybody out there using minix -

I'm doing a (free) operating system (just a hobby, won't be big and professional

like gnu) for 386(486) AT clones. This has been brewing since april, and is starting

to get ready. I'd like any feedback on things people like/dislike in minix, as my OS

resembles it somewhat (same physical layout of the filesystem (due to practical

reasons, among other things). . . Any suggestions are welcome, but I won't promise

I'll implement them  $\square$ 

Linus (torvalds@[redacted].fi)

PS. Yes — it's free of any minix code, and it has a multithreaded fs. It is NOT

protable[sic] (uses 386 task switching etc), and it probably
never will support

anything other than AT-harddisks, as that's all I have :-(.

Anyone reading this site will not need elaboration. Man, how far has Linux come? How far will it go? Will there someday be a small project that takes off and supplants Linucus Rex?
