

LF Networking Announces New Member Walmart, Bolsters a New Era of Enterprise Open Source Networking

- *Participation by the fortune 1 enterprise brings technical leadership and unprecedented scale to LFN projects across Network Management & Automation*
- *Koby Avital, EVP of Technology Platforms, Walmart Global Tech, joins the Governing Board as LFN Platinum member*
- *Community Growth signals ecosystem commitment to leverage open source for collaborative network transformation across Cloud, Enterprise and Service Provider Ecosystems.*

SAN FRANCISCO— March 31, 2021 – LF Networking (LFN), the de-facto collaboration ecosystem for Open Source Networking projects, today announced that Walmart has joined as a Platinum member. Walmart is the first retail member of LFN and joins 21 other global organizations as Platinum members all working to accelerate open source networking.

“We are thrilled to welcome Walmart to the LF Networking community,” said Arpit Joshipura, general manager, Networking, Edge and IoT, at the Linux Foundation. “As the world’s largest retailer, Walmart brings expertise across a broad swath of areas, including retail point of sale networking, enterprise IT, and hybrid cloud deployments. We look forward to collaborative efforts that accelerate the open source networking community.”

“I’m excited to join the Linux Foundation Governing Board on behalf of Walmart,” said Koby Avital, Executive Vice President, Walmart Global Tech. “By joining LFN, Walmart has

the opportunity to contribute, influence the cloud growth and better support the enterprise and service provider communities by open-sourcing innovative technologies across its retail infrastructure.”

Join the LF Networking community October 11-12 for Open Networking and Edge Summit (ONES), the industry’s premier open networking event, expanded to comprehensively cover Edge Computing, Edge Cloud & IoT. ONES North America enables collaborative development and innovation across enterprises, service providers/telcos and cloud providers to shape the future of networking and edge computing. About the Linux Foundation

The Linux Foundation is the organization of choice for the world’s top developers and companies to build ecosystems that accelerate open technology development and industry adoption. Together with the worldwide open source community, it is solving the hardest technology problems by creating the largest shared technology investment in history. Founded in 2000, The Linux Foundation today provides tools, training and events to scale any open source project, which together deliver an economic impact not achievable by any one company. More information can be found at www.linuxfoundation.org.
