Remove Title Bar From Firefox

If you, like me, appreciate clean and simple layouts. The Firefox Title Bar is a bit annoying, wastes space, and adds unneeded clutter. Here's how to remove it.

If this site (and the rest) doesn't make it obvious, I like my layouts to be simple. I don't want to waste space that doesn't give me information that I need. That's one of the reasons I use Linux – I can make the OS get out of my way and get my work done.

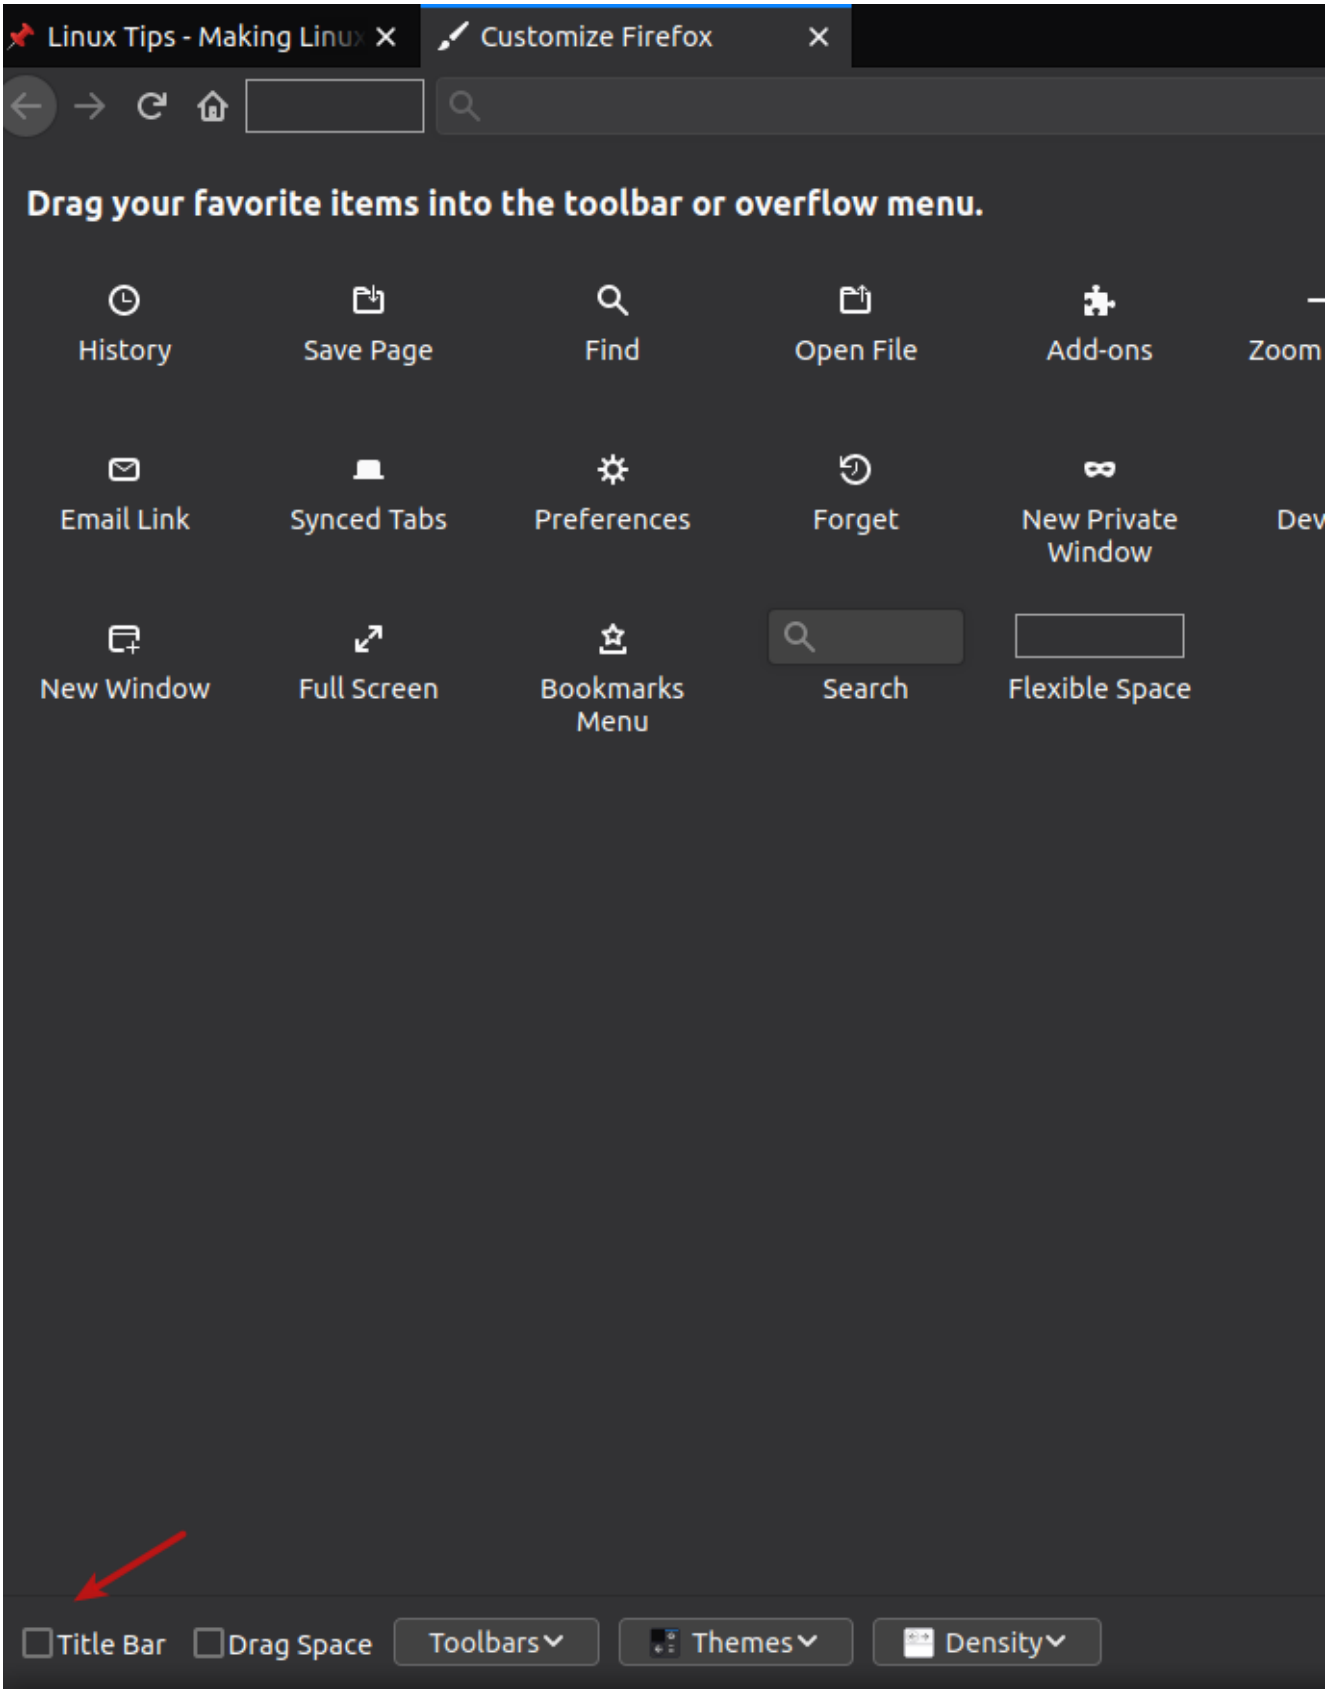

So, what am I talking about? A picture is worth 1,000 words…

That. That there is wasted space.

It's actually easy to get rid of, if you know where to look.

In Firefox, look in the upper-left. You'll see three vertical dots and those open the menu. Click that and then click on "Customize". Then, simply scroll down and untick the box for Title Bar.

It’s easy, once you know where to look. Also, I suck at editing images.

You don’t even have to restart the browser.
