

Linux History: A Reminder!

I've nearly finished Wiley's 10th Edition of the Linux Bible and it's a wonderful book. In it, way back near the start, there's this gem – and it really tells us how far Linux has come.

Some histories of Linux begin with the following message entitled "What would you like to see most in minix?" posted by Linus Torvalds to the comp.os.minix newsgroup on August 25, 1991, at <https://groups.google.com/forum/#!msg/comp.os.minix/dlNtH7RRrGA/SwRavCzVE7gJ>

Linus Benedict Torvalds

Hello everybody out there using minix – I'm doing a (free) operating system (just a hobby, won't be big and professional like gnu) for 386(486) AT clones. This has been brewing since april, and is starting to get ready. I'd like any feedback on things people like/dislike in minix, as my OS resembles it somewhat (same physical layout of the file-system (due to practical reasons, among other things)). . .Any suggestions are welcome, but I won't promise I'll implement them ☐

Linus (torvalds@[redacted].fi)

PS. Yes – it's free of any minix code, and it has a multi-threaded fs. It is NOT protable[sic] (uses 386 task switching etc), and it probably never will support anything other than AT-harddisks, as that's all I have :-(.

Anyone reading this site will not need elaboration. Man, how far has Linux come? How far will it go? Will there someday be a small project that takes off and supplants Linucus Rex?
